

# FLEET ANALYTICS

Portfolio intelligence for aircraft lessors.

See utilisation.

Spot risk.

Protect value.

## The Challenge

Most lessors are flying blind on day-to-day performance.

Maintenance exposure is recognised too late.

Lessee behaviour is harder to evidence than it should be.

## How SPARTA Can Help

Fleet Analytics by SPARTA turns flight movement, utilisation, and MRO activity into decision-ready insights across your fleet.

Flight movements | Cycles & flight hours | Stage length  
MRO events | Fleet activity trends

# EVERY DECISION, BACKED BY DATA.

## Protect Asset Value

Flag high-risk aircraft  
early.

## Reduce Maintenance Exposure

Identify  
maintenance-heavy  
utilisation patterns  
before costs escalate.

## Monitor Lessee Performance

Track utilisation  
intensity and  
operational outliers  
across your portfolio.

## What You Gain

- Fleet utilisation dashboards
- Last known location visibility
- Aircraft-type and operator breakdowns
- Route concentration risk indicators
- Maintenance event tracking
- Portfolio-level performance insights

## START YOUR FLEET INTELLIGENCE JOURNEY.
