our engine consultancy

We are an INDEPENDENT asset manager, providing comprehensive coverage to lessors, banks, equity investors and operators, globally and supported by our key regional offices in the USA, India and China as well as our headquarters, located in the heart of Ireland.

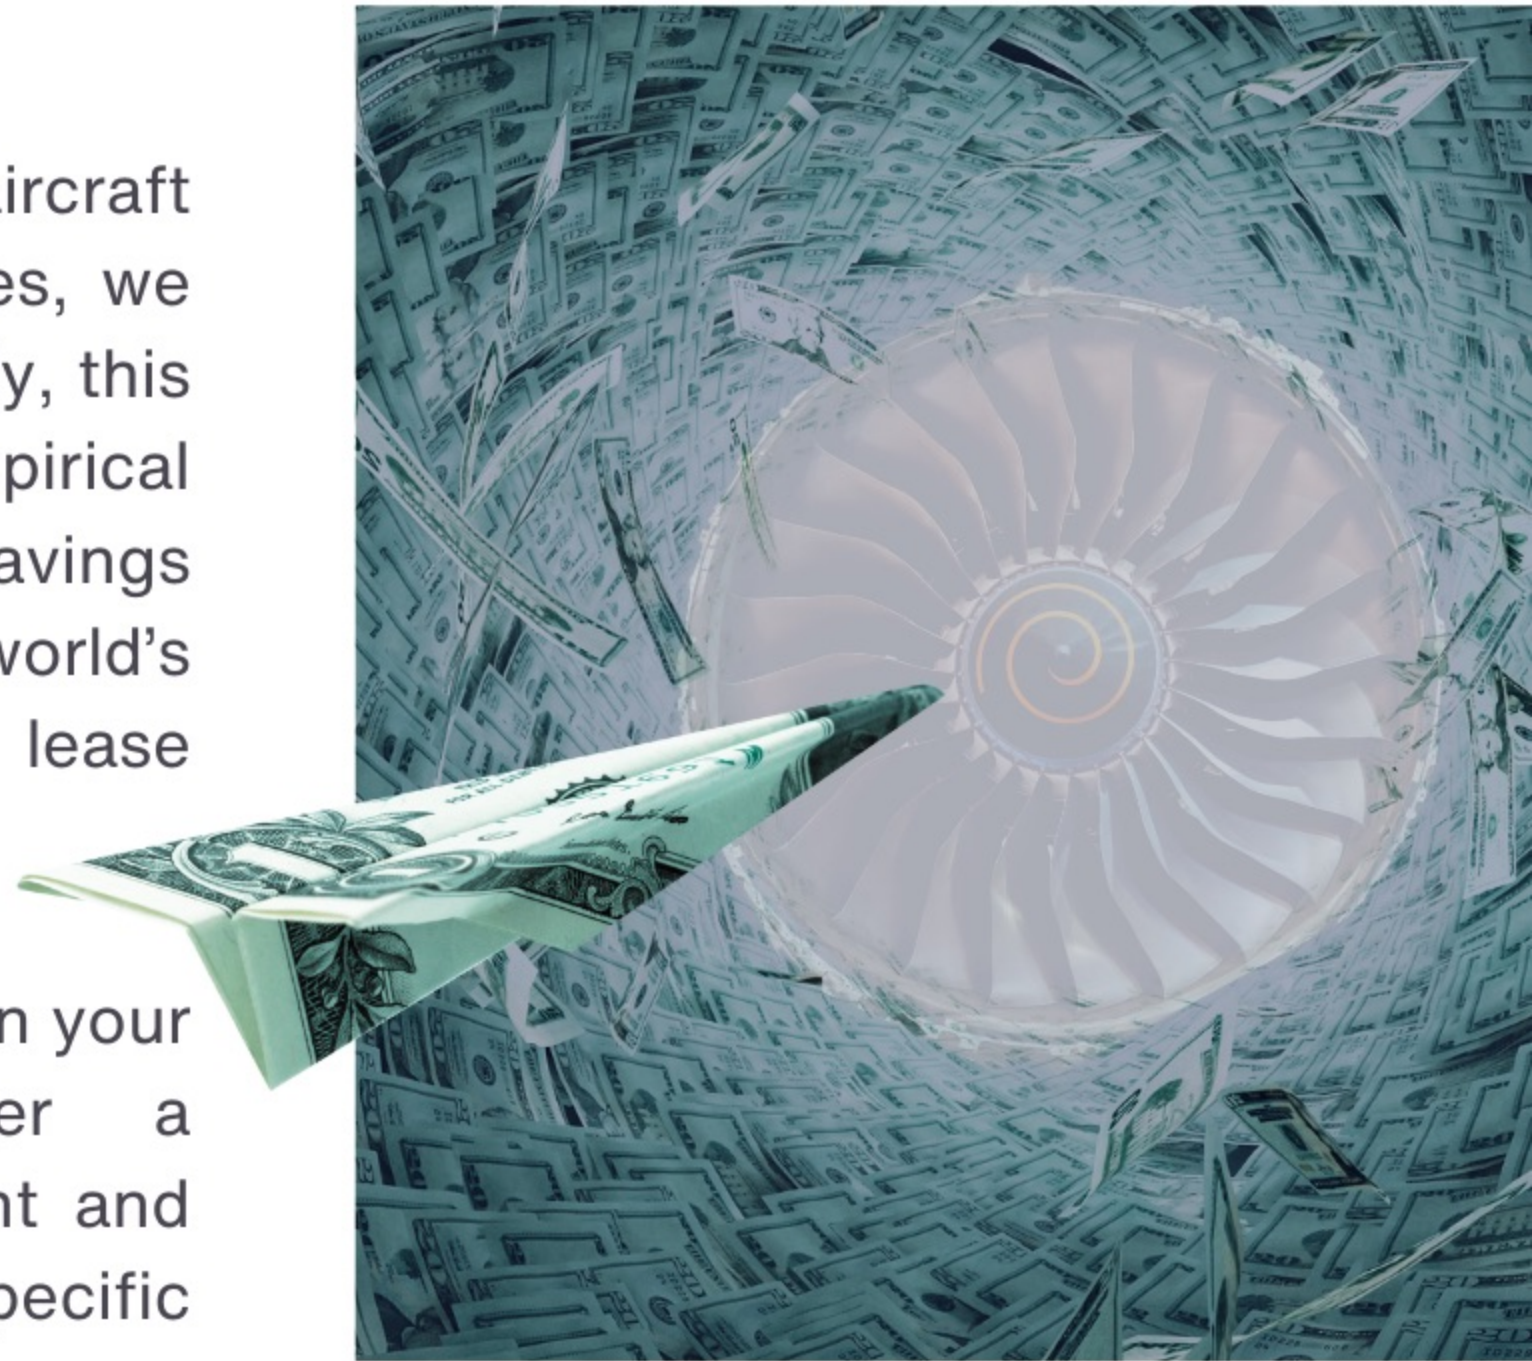

We have successfully combined technical heritage, wealth of in-depth sector knowledge and fundamental understanding of the asset class with the latest in state of the art technological advancements, ensuring our clients stay ahead of the pack.

Through the management of multiples of aircraft across a diverse and complex spread of services, we have amassed a wealth of experience. Importantly, this compelling mix of qualitative and quantitative empirical knowledge translates into efficiencies and cost savings for our clients, which include some of the world's largest lessors, financial institutions and lease managers.

We appreciate the need to keep a watchful eye on your engines throughout their life. We offer a comprehensive suite of powerplant management and advisory services designed to support your specific needs.

These services cater for the vast array of engine types and marques, spanning the world's commercial fleet. Rich technical and commercial knowledge has been successfully combined with the latest technologies to offer a robust 21st century approach to management, forecasting, financial planning, risk mitigation and value protection.

Expert Witness

Our team has amassed a wealth of experience in the industry. With the necessary experience and relevant qualifications, Acumen is on-hand to support solicitors and clients when expert witness services are required.

Trusted to provide fully independent, impartial, and reliable advice.

.....expert advice is not only critical but invaluable when things don't go to plan.....

General Advisor

We are here to help you evaluate your assets, interpret and protect reserve funds; map out future cash flow, plus identify and assist in helping mitigate assessment risk.

Technical Report Preparation

Our team is equipped to obtain the necessary key information, required to prepare technical reports for your team. These include strategies to safeguard reserve funds, protect engine value, advocate safe operation and a continuity of approach when it comes to use, maintenance and repairs.
