

Digital Transformation

Solutions for our leasing and finance customers

Engine Projections

with Airframe, APU and Landing Gear

- **Fleet planning using advanced analytics**

Compare shop visit costs and on-wing life of global fleets to assess fleet exposure during acquisition, lease and re-sale.

- **Negotiate the best terms with the customer**

Support your marketing team during lease negotiations with fast, accurate and data-driven MR rates.

- **Enable faster decision making**

Simulate real-life scenarios using cost models developed by engine experts to determine MR exposure and risk.

Lease Management System

- **End to end management of asset contracts**

Administer technical and commercial information of all your leases with integrated asset utilisation, invoice process, cashflow projections and lease rates.

- **Stay on top of your leasing business**

Monitor the health of your portfolio through built-in reports, bespoke dashboards, email alerts and other advanced reporting tools.

- **Manage maintenance events & claims**

Better control on asset maintenance through current event tracking, future projections and lessee claims processing.

Records Dataroom

- **Secure records on an ATA compliant platform**

Retain value of your aircraft assets by safely storing, indexing and OCR'ing digitised records.

- **Effective stakeholder collaboration**

Share information seamlessly between reps on the ground, project managers, lessee representatives and customer.

- **Full-scope records management**

Maintain your competitive advantage by getting paper records scanned, digitised and stored safely by our on-ground team.

Digital Transformation

Solutions for our leasing and finance customers

Projects Platform

- **Manage diverse inspections across the fleet**

Plan and execute mission-critical projects ranging from mid-term, acquisition and re-delivery, among others, on a single platform.

- **Oversee all projects in real-time**

Stay on top of all projects with live updates. Interact with all associated stakeholders for error free results.

- **Faster execution; bespoke reporting**

Optimise project execution through online reporting, custom templates and multi-system integrations.

Online Valuations

- **Quick, easy and reliable aircraft values**

Online, easy to use system for computation of a wide range of industry aircraft for a diverse set of aviation assets.

- **Validated by ISTAT certified senior appraisers**

Data-driven valuation models validated and used to scale valuation services and projects.

Digital Success Advisory

- **Digital transformation consulting**

Optimise your business operations to improve organisation productivity through digital transformation. Everything planned, executed and managed by our asset management experts and software development powerhouse.

- **Advanced analytics & automation**

Leverage the power of your data to augment decision making through best-in-class automation and analytics solutions.

- **Software development & integrations**

Fulfil your requirements of platform maintenance, systems integration or custom software development with us.

- **Cross-industry collaborations**

Plug-in our broad spectrum of partnerships to fill the gaps in your digital transformation journey. Be it a requirement for 3D digital twin technology, aviation ESG modelling, or even asset trading platform, DSA will plug it all.
