Objective

This five-day (2.5-hour sessions daily) instructor led online certificate program specifically designed to equip the candidates with detailed understanding of the technical asset management techniques that are required in the field of aviation. It provides an opportunity for aviation professionals to practice the principles and techniques to evaluate lease terms and conditions and obtain an understanding of the impact of maintenance and aircraft transitions on residual value.

Learning Outcomes

Upon course completion, participants will have an understanding of:

- Aviation business models
 - Asset management strategies
 - Managing the aircraft asset cycle
 - Maintaining the aircraft value during operation
 - Aircraft conditions: delivery, redelivery, transitions, predelivery and redelivery project management
 - Delivery and redelivery conditions along with review of specifications & negotiations
 - Lease extensions and revisions in today's business environment
 - It also covers areas of the risks and opportunities of the aircraft asset management cycle from initial delivery of the aircraft to part-out and scrapping
-

Who Should Attend?

- Experienced aircraft maintenance/Licensed engineers/ personnel who are wishing to shift their career to leasing industry
 - Technical representatives / inspectors
 - Engineers / AME diploma holders with experience in planning / quality control / power plant
 - AME diploma holders with on job training experience with commercial airlines
 - Senior executives from the airline, leasing and financial institutions
-
