DATA MANAGEMENT SERVICES

Your records hold the value of your assets and Acumen has developed multiple support services to assist clients in managing the high volume of data generated through an asset's life.

To deliver these services effectively requires skill, dedication and a high quality of service built using tried and tested processes and procedures. Acumen has perfected this and, through the use of a blend of artificial and human intelligence, has the necessary winning combination of knowledge and latest, most advanced technologies to help you stay on track and ahead of the pack.

.....We understand the value of asset records and our team's knowledge, attention to detail, ability and flexibility to adapt to meet client requirements makes Acumen the perfect choice.....

DATA MANAGEMENT SERVICES

Acumen's data management services encompass 3 key areas

RegionalOne

Sergio Morales
Technical Operations Manager

.....The Acumen team is comprised of a dedicated group of astute professionals that provide us with Data Management support services across our portfolio, 24/7....

Data Management

Data management is at the heart of what Acumen delivers to its clientele. We are relied on 365 days of the year to support our clients day to day operations.

The services offered, include:

- Records review and gap reporting
- Review of records pertaining to airframe, major components (B2B review), AD/ SB, and modifications
- Workscope review
- Component exchange review
- Mini pack preparations of landing gears, engines & APU
- Preparation and review of aircraft technical specifications
- Review of value drivers such as weight, thrust and configuration
- Management of assets on various asset management platforms, including SPARTA, CMS and Leasepoint
- Reporting and analysis for portfolio management

SPA • RTA

a digital asset manager, an extension of the human workplace

- Providing interconnected data links to other modules within its platform and provides seamless access to scanned asset records
- Includes robust "search" features, optimised using Natural Language Processing (NLP), Artificial Intelligence (AI) and Machine Learning (ML)
- Displayed using an intuitive interface and data indexing

Digitisation & Indexing

Taking care of your records,
every step of the way

Acumen is ready to:

- Scan records for migration into digital platforms
- Segregate and upload multiple records into various digital platforms such as SPARTA, STREAM, AMOS and FlyDocs
- Provide end-to-end management of records on a variety of digital platforms to ensure secure and timely access to information by stakeholders

.....Acumen delivers on its promise to provide indexed records in a secure environment; easily accessible, globally.....

Commercial Support

Acumen works with clients to tailor its support to meet the specific commercial needs of the operation. It provides cost effective, bespoke and customisable process driven solutions, which are then adopted, maintained and reviewed periodically to ensure they remain effective.

The services regularly include:

- Monthly utilisation review and reporting for MR invoicing
- MR reconciliation
- Forecasting end of lease adjustment

Acumen is trusted to manage end-to-end MR claims reviews, whilst keeping clients apprised every step of the way.

Working directly with lessees on behalf of our clients we have the experience and knowledge to collect and correctly interpret preliminary worksopes and confirm acceptance.

We are sufficiently resourced to provide the necessary follow up, document collection and invoice review in line with given MR draw down policies and provide documented recommendations.

Key Projects

Acumen has experience providing large volume data migration

Acumen has been fortunate enough to have gained the necessary exposure, knowledge and ability to support significant projects of scale and size, thereby enabling it to provide a proven, efficient and cost effective solution to clients. These projects have included the fleet data migration for over 450 commercial aircraft.

Acquisition of 45 aircraft

Acumen provided data management, digitisation and indexing services to a top tier commercial aircraft lessor during the integration of a high volume of fleet data into their preferred data management platform. As part of this exercise Acumen also closely supported the lessor with maintenance reserve reconciliation of the acquired fleet.

US\$10.38Bn portfolio acquisition

Acumen was at the forefront, providing data migration for the entire portfolio. Data for in excess of 300 commercial airplanes was migrated into the lessor's records management and contracts management platforms by Acumen's Data Management Team. These activities were performed in parallel and this level of project exposure provided Acumen with valuable hands-on experience and the opportunity to obtain the knowledge necessary to manage projects of significant scale.

Lessor acquisition including 109 aircraft

Acumen's Data Management Team was responsible for the migration of over 100 commercial airplanes. Data management, digitisation and indexing services were among the services provided for this project.

Acumen regularly supports lessors, providing End of Lease Adjustment forecasts and MR reconciliation exercises. We actively engage in digitisation of records and assist a variety of clients with digital platform migration and records upkeep.

ABOUT ACUMEN

We are an independent asset management organisation providing comprehensive in-house asset management support to lessors, banks, equity investors and operators in the aviation sector, from sourcing and acquisition to transition or disposal.

Headquartered in Ireland, Acumen has a global reach with regional offices in the USA, India and China.
